

Final Distinction Project

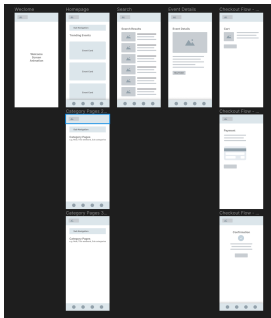

Figma Advanced

DANIEL SCOTT / Bring Your Own Laptop

Event App - Desktop Website

Take your event mobile app design and build out a website/desktop version. Use both of these designs to create a portfolio piece.

- Before you start, write down what your expectations are for the transition.
 - How will they differ?
 - What will be consistent?
 - How will you maintain continuity for people swapping between the mobile and desktop app.
- Research:
 - The differences between Mobile & Desktop design. How does this inform your initial expectations?
 - What a good UX portfolio piece should include.
 - Research a place to post your portfolio if you haven't already created one.
- Start with a wireframe.
 - Build out the same structure as in the last of the class projects.

-
- Create the desktop design in a new Figma file.
 - Use one shared library for both mobile app and desktop versions.
 - Document the benefits and limitations of one shared library. E.g. Styles & Components.
- Have your design tested by at least one person.
 - Document the test. What went well, what needs improvement.
- Turn your mobile app & desktop designs into a published portfolio piece.

Must Haves

- Show your initial brief & persona.
- Show the mobile and desktop versions.
- Descriptions explaining the project and what you've learnt through the process.
- Include 3 'view only' links to your wireframe, mobile and desktop hi-fi prototypes.
- Credit any photographs, icons or community figma projects you have used. Be clear what is your own original work and what is borrowed/appropriated.
- You must add a note saying that this project is a UX case study.

How to submit your work

- All 'must haves' can be written/designed into Figma pages and frames. Screen shot each of these and upload using the button under this Final Project video.
- If you have a portfolio, share a link to your Distinction project presentation there
- Optional
 - Screen Recording
 - If you choose to screen capture your prototype in addition to your screenshots, please upload it to Youtube, Behance, Vimeo or similar.
 - Share the link to your video.
- Social Media - Optional

- Share a link to your portfolio piece.
- Share the video link of you interacting with your design. Upload it to Youtube, Behance, Vimeo or similar.
 - Instagram: [@bringyourownlaptop](#)
 - Twitter: [@danlovesadobe](#)
 - Facebook group [here](#)
 - LinkedIn group [here](#)
 - Make sure you say it's the Final Distinction Project from the Figma Advanced Course

How long should this take?

- Four hours minimum, or up to one to two days depending on your skill level and the time you have available.
